# WorldPasswordDay

Top password tips

**Creating Strong Passwords**

- Think 3 random words
- No personal details
- Don't reuse passwords
- Use numbers and symbols to add complexity

Example: 3redhouseMonkeys2!

**Storing Passwords**

Use a password manager

A password manager stores, generates, and auto-fills your passwords – making your life easier and more secure.

**Don't Just Rely on Passwords**

2FA

Enable two-factor authentication if available. It provides a big boost in protection for your accounts.

Start by making sure you have 2FA on your most important accounts such as your email.
